

Jason Breedlove

FULL-STACK SOFTWARE DEVELOPER | SECURITY-MINDED ENGINEER

Auburn, California | 916-251-9259 | jason@jasonbreedlove.dev | jasonbreedlove.dev | github.com/Breedlove-Jason

PROFESSIONAL SUMMARY

Full-stack developer and decorated U.S. Army veteran building secure, accessible applications with React, TypeScript, Node.js, Python, Express, Flask, MongoDB, and PostgreSQL. Develops polished interfaces, validated APIs, real-time systems, data tools, automated tests, and production deployments. Served as a battalion-level Information Management Officer with leadership experience and accountability for more than \$1 million in assets.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, SQL, HTML5, CSS3

Frontend: React, React Native, Vite, responsive design, accessibility, Canvas

Backend and data: Node.js, Express, Flask, Django, REST APIs, Socket.IO, MongoDB, PostgreSQL, SQLAlchemy, SQLite

Delivery and security: Git, GitHub Actions, Docker, Linux, Vercel, Render, authentication, input validation, CSP, HTTPS, environment management

SELECTED ENGINEERING PROJECTS

Independent Software Development | 2026-Present

ProductStore | React, TypeScript, Express, MongoDB | [Live project](#)

- Built a responsive catalog workspace with search, collections, stock tracking, CSV export, shared validation, integer-cent pricing, signed owner sessions, and revision-aware updates.

envRanger | TypeScript, Node.js, dotenvx | [Source](#)

- Created a local-first CLI that discovers, validates, encrypts, and routes environment variables across frontend, backend, and root scopes with preview-first changes and atomic writes.

Ledger | React, TypeScript, Vite | [Live project](#)

- Combined expense tracking, monthly budgets, an everyday calculator, savings projections, CSV export, and validated backups in a private browser-local workspace with eight core tests.

Reuters Similarity Lab | Python, Jupyter, NLP | [Source](#)

- Indexed 19,043 Reuters articles for explainable Jaccard similarity across word n-grams; added checksum-verified data loading, interactive search, benchmarks, visual comparisons, and unit tests.

MemoryBeam | React Native, Expo, TypeScript, SQLite | [Portfolio](#)

- Developing a mobile companion for recording, editing, and reliably transferring personal videos to a dedicated keepsake device using guided capture and resumable delivery workflows.

MILITARY TECHNOLOGY AND LEADERSHIP EXPERIENCE

United States Army | 2002-2009

- Administrative Training Officer, Auburn Recruiting Station (2005-2009): supported operational readiness and prepared recruits for combat training and deployment.
- Battalion Information Management Officer and Rear Detachment Commander, 1-64 Armor Battalion (2002-2005): delivered IT support and training, protected information-system readiness, and managed more than \$1 million in assets.
- Received the Army Commendation Medal for Valor for calmness and bravery under intense enemy fire.

EDUCATION AND CONTINUING STUDY

Colorado Technical University | Studies in information technology, computer security, and network management | 4.0 GPA | President's List and Dean's List

Continuing education: Python, JavaScript, React, web design, Linux administration, ethical hacking, and agentic AI workflows
